

WHEN YOU NEED TO BE CERTAIN

TM

HIGHLY SPECIALIZED PROCESS, POWER AND NUCLEAR PIPING
SYSTEMS FOR YOUR CRITICAL APPLICATIONS.

certainty

...is a rare concept these days. SPSI is a rare breed of company. Offering high quality piping solutions, on-time and on-budget and an unparalleled knowledge base, the SPSI team will provide you with the certainty you need to accomplish your projects' goals.

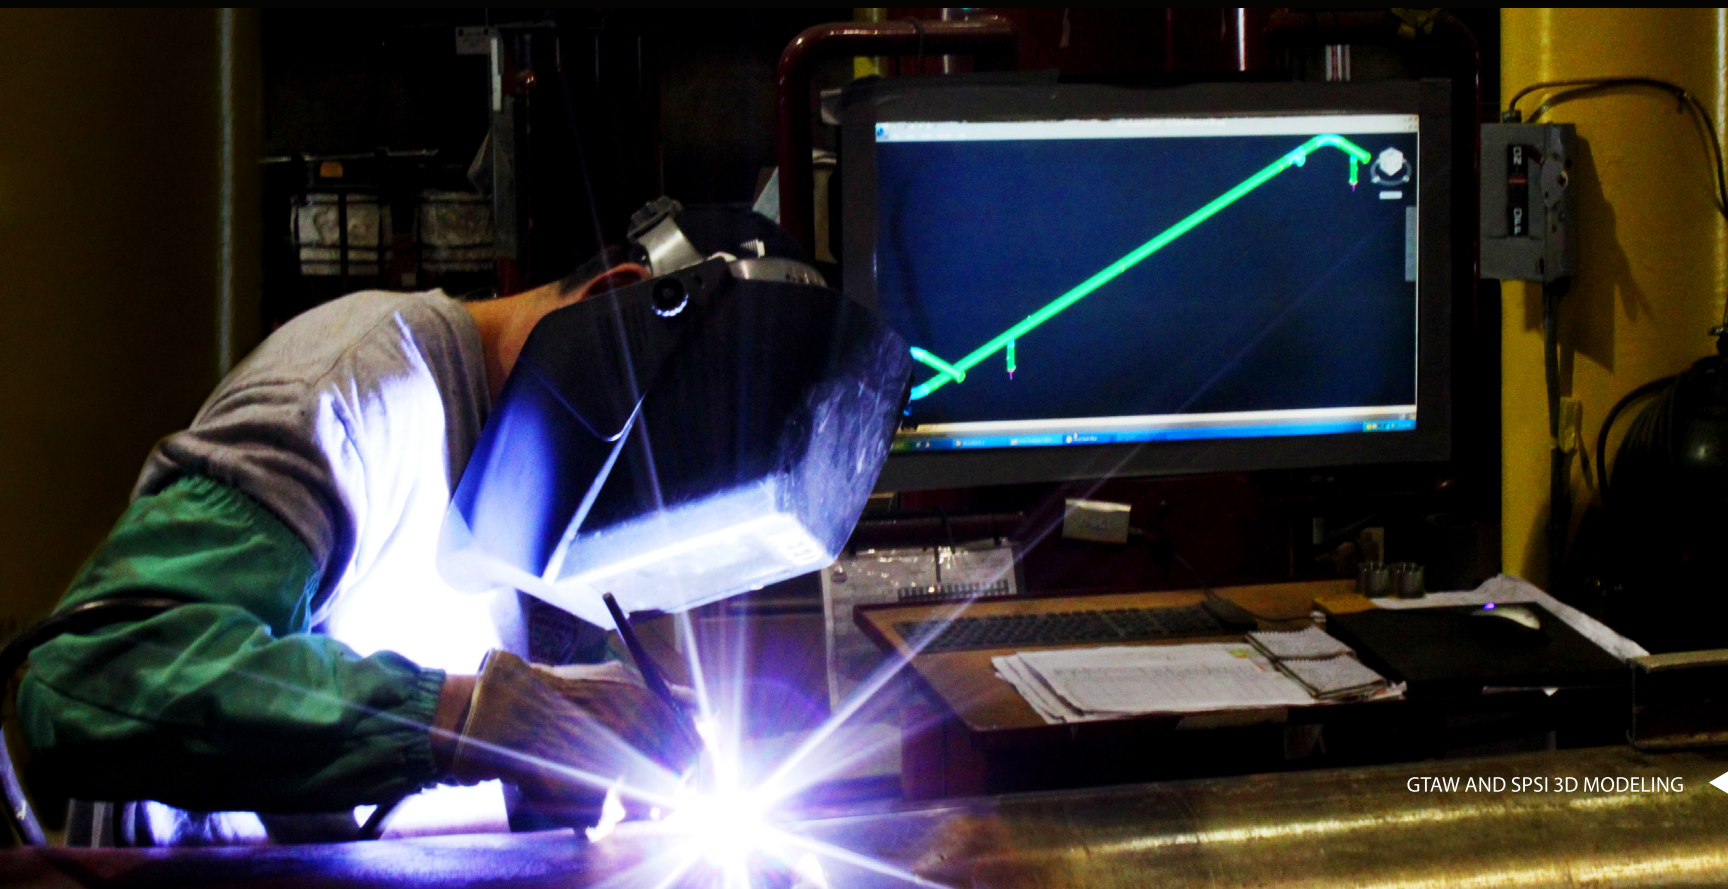

From in-house quality testing and automated welding to nationally accredited training facilities and Live Spool Status™ reports, SPSI has the power and expertise to successfully produce highly specialized piping systems for your critical applications. The value of our distinctly efficient operation is further realized as speed and quality prevail while costs are minimized. With SPSI, you gain complete visibility of our processes ensuring total confidence in timing and budget.

MAINTAINING YOUR SCHEDULE

Your project’s critical path is filled with steadfast deadlines...one late milestone can expand your timeline exponentially. Managing your supply chain shouldn’t require you to manage your supplier’s business. The SPSI team is well equipped with processes, tools and a mindset that ensures absolute on-time delivery.

EFFICIENT OPERATIONS

SPSI integrates the right combination of people, process and technology to enhance the productivity of our business operation. This enables us to apply best practices that increase efficiency, boost focus and improve the quality of our workmanship.

TOTAL TRANSPARENCY

SPSI’s Live Spool Status™, developed in-house as a proprietary network tool, allows our customers to access secure online reports, available 24/7. You will know exactly where your project is in our facility, in real time, including process details and documentation.

PERSONAL COMMITMENT

The entire SPSI team supports your project success criteria and ensures your milestones are met. From highly skilled craftsmen to detailed project managers, all are dedicated to maintaining your schedule.

Capabilities at a Glance

PRODUCT RANGE

- 1/4” – 72” PIPE DIAMETERS
- UP TO 6” WALL THICKNESS
- STEEL AND ALLOY METALS

100% IN-HOUSE QUALITY TESTING & INSPECTION

- | | |
|-------------------------------|---------------|
| - NON-DESTRUCTIVE EXAMINATION | - HYDROSTATIC |
| - HARDNESS | - PNEUMATIC |

SPSI WELDING PROCESSES

- MANUAL AND COMPUTER-CONTROLLED FLAME AND PLASMA CUTTING OPERATIONS
- MACHINE SUBMERGED ARC WELDING (SAW)
- MANUAL AND MACHINE GAS METAL ARC WELDING AND FLUX-CORED ARC WELDING (GMAW, GMAW-P, GMAW-STT, FCAW)
- MANUAL GAS TUNGSTEN ARC WELDING (GTAW)
- SHIELDED METAL ARC WELDING (SMAW)

SPSI TRAINING CENTER

UTILIZING HIGH QUALITY MATERIALS AND COMPONENTS

Countless resources go into specifying materials and solutions that will get the job done. You need to trust that your suppliers are capable and reliable enough to adhere to those specifications. Trust in us - precision instrumentation, proper certifications and an unprecedented training program are a few of the ways that SPSI meets and exceeds your quality expectations.

PRECISE

Rotoweld machinery takes precision to a new level while our in-house quality testing ensures total accuracy. We also inspect all incoming materials to confirm specification integrity from our own suppliers.

CERTIFIED

Obtaining the proper Certificates of Authorization is crucial to our ability to fabricate to your specifications. What's more, it gives you the peace of mind to know that your piping system is first rate.

TRAINED

Our NCCER-accredited training program and Accelerated Advanced Welder Training Program are one-of-a-kind. We respect the value of developing a sustainable and highly skilled workforce and quickly realize the benefits of exceptionally efficient, quality performances.

SPSI Certificates of Authorization

ASME ACCREDITED QUALITY SYSTEM

-  NUCLEAR COMPONENTS
-  NUCLEAR INSTALLATION AND SHOP ASSEMBLY
-  NUCLEAR SUPPORTS
-  NUCLEAR PARTS, APPURTENANCES AND SUPPORTS
-  POWER BOILERS
-  PRESSURE PIPING
-  UNFIRED PRESSURE VESSELS
- NBIC**
-  REPAIR AND/OR ALTERATION
-  REGISTER BOILERS AND PRESSURE VESSELS WITH NBIC

MEETING BUDGET REQUIREMENTS

Budgets are tighter than ever. Keeping costs in line and ensuring a high value for your investment is an on-going challenge. Leveraging technology to enhance our efficiencies and leveraging our staff to provide open, personal communication is SPSI's approach to helping you achieve positive bottom line results.

SMOOTHING THE PROCESS

We obtain significant operational efficiencies as the entire SPSI campus is fully networked. Documentation is readily accessible, bar coded materials track seamlessly and spools ship on time - saving both time and money.

WALKING THE WALK

Personal attention to detail and personal communication are an integral part of the SPSI process. Effective communication keeps you informed and ensures a unified plan for success.

EMPHASIZING THE VALUE

Investing in our own quality testing instruments and our comprehensive, fully accredited training facility help control costs and provide considerable advantages for our customers.

RELYING ON SUPPLIERS

Wouldn't it make your job a little easier if your suppliers came to you with new ideas and fresh insight and were willing to share their expertise? From our perspective, it is as much about the project at hand as it is about creating a partnership that adds value.

EXPERTISE

Partly due to our training programs and largely due to our years of experience as specialized pipe fabricators, SPSI maintains an extensive and growing knowledge base that we readily share with our customers. This expertise and transparent communication style leads to long term relationships and trusted partnerships with our customers.

SUPPORT

From a live voice that greets you on the phone to a knowledgeable staff that handles the details, SPSI places a great deal of emphasis on quality customer service and support.

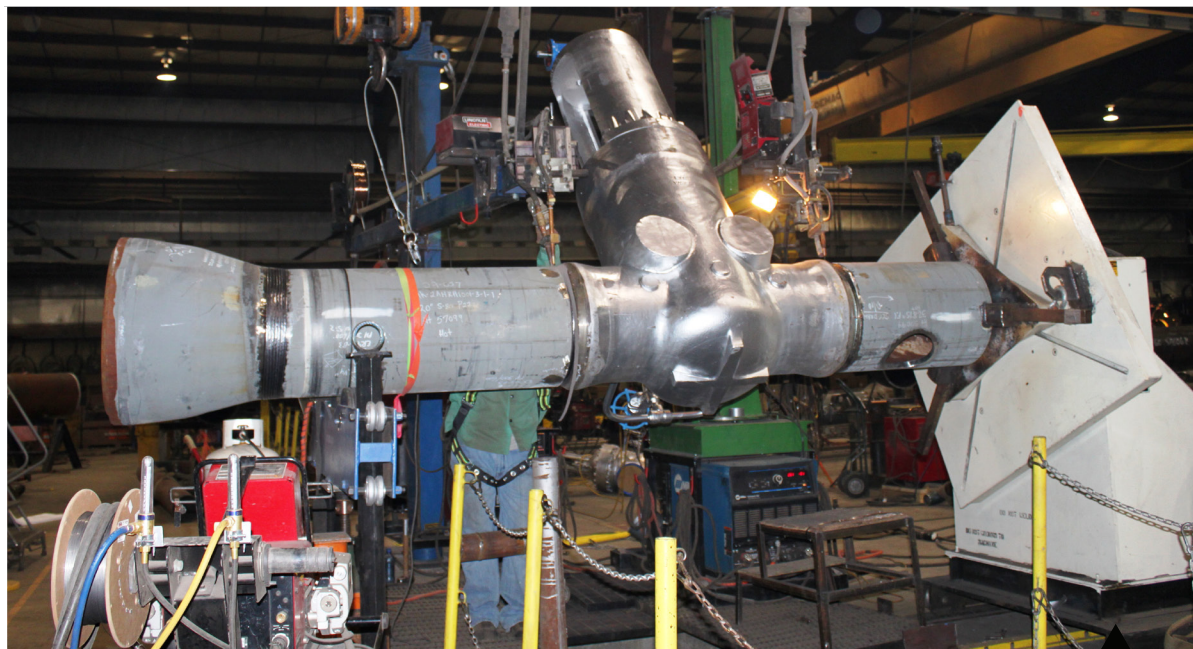

PARTNERSHIP

We appreciate our role as a valued partner with many of the world's leading companies. This arrangement typically provides SPSI with the opportunity to be more proactive, offer more relevant solutions and add greater value to our customers' business.

safety

IT'S NOT A CONCEPT, IT'S A COMMITMENT

- AWARD WINNING SAFETY PROGRAM – MULTIPLE AWARDS AND RECOGNITION FROM NATIONAL AND STATE ORGANIZATIONS
- SPSI IS AN OSHA (OCCUPATIONAL SAFETY & HEALTH ASSOCIATION) OUTREACH TRAINING CENTER FOR NORTHEAST OHIO, OFFERING CERTIFICATION COURSES TO ASSOCIATES, CUSTOMERS AND AREA BUSINESSES
- SPSI HAS ESTABLISHED PROACTIVE SAFETY, HEALTH AND FIRST RESPONDER PROGRAMS, OFFERED TO ALL ASSOCIATES

▶ ROTOWELD 3000 GMAW/FCAW/SAW UNIT

As a specialized fabricator of process, power and nuclear piping systems, SPSI strives to provide the highest levels of quality, integrity and service throughout the industries we serve. It is our enduring mission to be the Company of choice for our Customers, our Associates and our Suppliers. We have an impressive record of providing innovative solutions which continues through significant investments in leading-edge technologies, dedication to superior quality and a commitment to the on-going training and welfare of our staff.

SPSI Value Proposition

TO PROVIDE OUR CUSTOMERS:

- SUPERIOR PRODUCTS
- SUPERIOR SERVICE
- UNSURPASSED QUALITY
- ON-TIME DELIVERY

SPSI Core Values

- SAFETY
- INTEGRITY
- TEAMWORK
- PERSONAL & PROFESSIONAL DEVELOPMENT
- EXCELLENCE
- RESPECT
